

PRIORITY APPRENTICESHIPS

LABORATORY TECHNICIAN LEVEL 3

WHY THE LABORATORY TECHNICIAN APPRENTICESHIP?

Whether you work in the food sector, in construction, with pharmaceuticals, nuclear energy, biotech, or education, laboratories need skilled technicians to provide technical support in the laboratory environment.

The apprenticeship provides a great opportunity for existing technicians to continue their professional development, and become occupationally competent in a technician role. It is also an excellent tool for businesses looking to recruit new staff into laboratory roles.

Technicians who train with us will become experts in the health and safety of their workplace, learn how to effectively quality assure their practice and procedures, and be able to effectively produce, analyse and interpret data and results.

WHO IS THE APPRENTICESHIP AIMED AT?

Any technician/laboratory assistant who

- is interested in professional development
- would like to refresh or refine their professional skills
- wants to improve their expertise in health and safety, quality assurance and data analysis and reporting

DETAILS OF THE APPRENTICESHIP:

- Apprentices will demonstrate core knowledge, skills and behaviours to be fully competent as a Laboratory Technician
- The apprenticeship will typically take 21 months to complete

FURTHER PROFESSIONAL DEVELOPMENT:

Following successful completion of the programme, whilst not a formal requirement to work as a lab technician, you may consider professional registration with the Royal Society of Biology, the Institute of Physics or the Royal Society of Chemistry.

"As well as enhancing their scientific and technical credentials, lab technicians focus heavily on research and making discoveries. They work on a range of projects with colleagues, developing a broader subject expertise, and developing new skills and approaches."
